PRESS RELEASE

Budapest, 22 March 2016

---

**Request for the CAP Fitness Check**  
**Can the CAP deliver a sustainable European food and farming system?**

CEEweb for Biodiversity has joined European NGOs in an open letter to the President of the European Commission Jean-Claude Juncker asking for a review of the European food and farming system. We believe that this system is largely broken and that the main policy currently addressing it – the Common Agricultural Policy (CAP) – requires an urgent assessment, as it seems not equipped to address the fundamental challenges that Europe is facing in this sector.

You may read the full letter [here](#).
