GREEN ROOFS CALENDAR 2017

The photos were submitted to the Green Roof Beauty Contest organised by CEEweb for Biodiversity in partnership with Hungarian Association of Green Roof, Green Wall and Green Façade Builders and Livingroofs.org and supported by the European Commission.

The aim of this photo contest was not only to showcase the beauty of green roofs, but also to emphasise the advantages they provide.

Green roofs, as elements of green infrastructure, are beneficial to our health and well-being, fighting climate change, creating resilient cities and sustainable agriculture and saving public money. Because of all these benefits, we believe you should advocate

for a bigger part of the next EU budget for green infrastructure. That way, the EU citizens will get a timely response from you to tackle all the challenges they are facing today.
